

FEBRUARY

23 Shabaan 1446 H

2025

Saturday

* Save certificates on "Github repository"

23/7/25

Week 2 - Grit

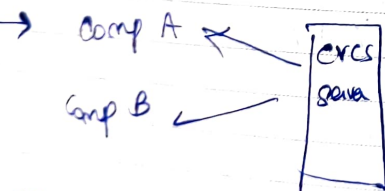

Day 1

Version controlling System :-

System that records changes of files, computer program or any other collection of information.

Before it was CVCS (only 1 central system)

* Onk learning resources in pdf of Git
Finish the certificate course.

now its distributed server (DVCS)

FEBRUARY

24 Shabaan 1446 H

23

2025

شباط / فبراير

24 شعبان - 1446 هـ

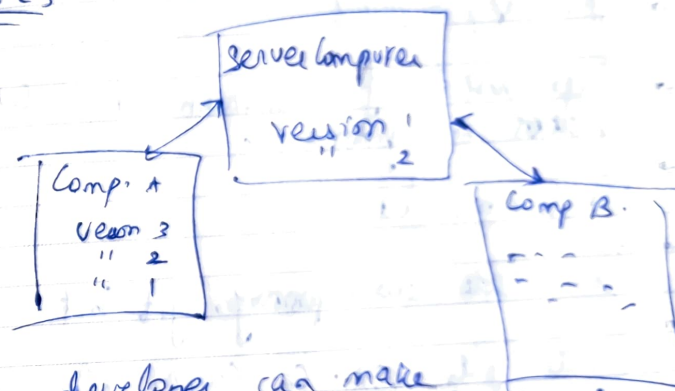

الأحد

Sunday

Version Control System allows :-

- Reverting files to prev state
- compare changes over time
- who modified what?

Grit, CVS, mercurry etc. uses DVCS

DVCS

Any developer can make changes & they r all in the same page.

Adv of Git

- DVCS
- High spd
- Easy to track changes
- individual development
- offline usage
- snapshots not diff.

Week 3

FEBRUARY

25 Shabaan 1446 H

Monday

24

2025

Birbulet, github, gitLab - tools used
for version control (VC).

git workflow

checking in changes -

git config --global

then used for authentication (check
videos on phone).

git commands

① create new Repository: `git init`

Create file "test.c" copy & paste cloning
process).

git status command

Says which all files are
modified code.

git add.

FEBRUARY

26 Shabaan 1446 H

Tuesday

25

2025

شباط / فبراير

26 شعبان 1446 هـ

الثلاثاء

[Enter]
git status
[Enter]

Flow of commands

git clone

git init

git add.

git status → (A)

git commit takes ~~some~~ file to local repository
from staging area.

git commit -m "added local..."

git commit --amend -m "message"

→ This is to correct any errors in
prev. msg.

Week 9

FEBRUARY

27 Shabaan 1446 H

26

2025

Wednesday

git log command helps to see git commit history. to see if corrections were made.

code: git log [enter]

Commit hash code, author, date we can see 'where local & remote repositories -

green txt → local repos.
orange " remote "

GitHub, google is remote rep. Empty folders not added, no push to

local (A)

git commit -m "commit" command -m "msg"
git amend
git log

git add. → helps to save the work & push to staging area

DO NOT edit shift in github
only in lap folder & push

FEBRUARY

28 Shabaan 1446 H

Thursday

git log -n p → history for "p" no. of commits

git log --stat → history of affected files.

git log -stat finish assignment

submit https link for repository link

Friday

See the courses -

Branching :-

main branch → we never use - We create 4 branches which we used which :-

① → Dev branch → after this passed to QA
② → QA
③ → Stage
④ → Prod
new task completed moved to stage branch here demo can be tested
→ sprint demo done

Reminder

شباط / فبراير

٢٨ شعبان - ١٤٤٦ هـ

27

2025

الخميس

Week 9

FEBRUARY

29 Shabaan 1446 H

28

2025

Friday

الجمعة / فبراير

1 شعبان - 1446 هـ

الجمعة

①

Dev

- Task Branching - Task Branch 1
 - " " 2
 - " " 3

Each developer works on each task.

* They will raise Pull request (PR) to merge to dev branch

Lead will review it, then only merged to dev.

Dev testing done next by dev team

② QA → QA testing

③ Stage → QA testing → Client testing / QA testing

④ Prod → low lying branch, its deployed branch.

MARCH

\$ git commit -m "from Dev"

\$ g checkout main

\$ g
Copy smthg in notepad & the pic 10:11

\$ g diff

\$ g add

\$ g status

\$ g commit -m "from main"

\$ g merge Dev

\$ g add

\$ g commit -m "resolved"

\$ g add

MARCH

6 Ramadhaan 1446 H

Thursday

06

2025

أذار / مارس
١٤٤٦ هـ

الخميس

```

$ git commit -m "commit 1"
$ git add .
$ git commit -m "commit 2"
  (note ad chge)
$ git add .
$ git commit -m "commit from dev"
$ git rebase main Dev → msg'd main to dev
$ git checkout
$ git rebase Dev
$ git rebase Dev main
$ git rebase Dev main
$ git add .
$ git commit -m "commit 3"
  
```

MARCH

7 Ramadhaan 1446 H

Friday

07

2025

أذار / مارس
١٤٤٦ هـ

الجمعة

```

$ git checkout main
$ git add .
$ git commit -m "commit main 3"
$ git rebase Dev
$ git (chk table) commit
  * Ignore patch commands and all
  * merge file?
  * git commit --amend -m "msg" → to edit a wrong commit.
  
```
